### **DETAILED ACTION**

This Office Action is a response to Applicants Preliminary Amendment filed September 8, 2003.

Claims 1-38 have been canceled. New claims 69-98 are acknowledged.

Claims 39-98 are pending in the instant application.

Claims 39-98 have been examined on the merits.

### ***Information Disclosure Statement***

Applicants Information Disclosure Statement filed July 2, 2003 is acknowledged. The references referred to therein have been considered on the merits.

### ***Priority***

Applicants claim for priority, found in the Application Data Sheet, filed July 2, 2003, to USSN 09/355,221, filed July 23, 1999, which is a national stage application of PCT/US98/01196, filed January 21, 1998, which claims priority to US Provisional Application 60/037,352, filed January 23, 1997 is acknowledged.

***Response to Amendment***

In response to the preliminary amendment filed September 8, 2003, it is acknowledged that claims 69-98 correspond exactly or substantially to one or more claims of U.S. Patent 6,448,009.

Additionally, it is acknowledged that claims 39-68 correspond exactly or substantially to one or more claims of U.S. Patent 6,183,959.

***Nucleotide and/or Amino Acid Sequence Disclosure***

This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR §1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 §1.821 through 1.825 for the reason(s) set forth below. Applicant's attention is directed to these regulations, published at 1114 OG 29, May 15, 1990 and at 55 Fed. Reg. 18230, May 1, 1990. It is noted that the application fails to comply with 37 CFR §1.821(a) and (d). For example, see pages 82, 67, and 68. The above are examples and is not intended to indicate that the Examiner has made an exhaustive review of the application. Applicant must fully comply with the sequence rules for any response to this action to be considered fully responsive.

***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed.

Art Unit: 1635

Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 39-98 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-6 of U.S. Patent No. 6,605,429 ('429). Although the conflicting claims are not identical, they are not patentably distinct from each other because the subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter as follows: The method of identifying regulatory gene products and genes that control the expression of a particular selected gene of ('429) is fully encompassed in the method for identifying a nucleic acid molecule that modulates a process in a biological system, as recited in claims 39-98 of the instant application.
